SKILLS

Programming Languages
Python, Java

Database
MySQL

Others
LLM API integration, Web development,
Debugging and testing

Tools
GitHub, Arduino

STRENGTHS

- Quick learner
- Teamwork
- Problem solving
- Adaptability

LANGUAGES KNOWN

- Tamil
- English
- German (A1)

HOBBIES

- Gym and fitness
- Listening to music
- Reading manga and manhwa

PROFILE

ECE student at M. Kumarasamy College of Engineering (2024-2028 batch) with a keen interest in software development. Built projects using Python, Java and MySQL, including an AI workflow automation platform at a hackathon. Seeking an internship to learn and contribute as a software developer.

PROJECTS

AI Workflow Automation Platform

Hackathon project

Tech: Python, LLM API

- Built a platform where an LLM completes multi-step tasks by calling registered tools through a Python backend.
- Designed it so each step stays controllable and the workflow can recover when a step fails.

Ambulance SOS and Auto-Dispatch System

Tech: Java

- Built an app that sends an SOS alert with live location to the backend.
- Set up the backend to auto-dispatch an ambulance to that location.
- Tested the system locally with the app and backend on the same network.

Smart Crop Advisory System

Tech: Python, MySQL

- Built a web app that helps farmers analyse real-time field data and make better crop decisions.
- Used MySQL to store field data and Python for the backend logic that gives crop advice.

Sound-Controlled Switch

Tech: Arduino, sound sensor, relay

- Built a sound-activated switch that lets physically disabled people operate electrical appliances on their own.
- Tested and debugged each module to make the system reliable.

EDUCATION

B.E. Electronics and Communication Engineering

M. Kumarasamy College of Engineering, Karur

2024 - 2028

CGPA: 6.66

12th Standard

SKV Vidhyaashram Senior Secondary School

2024

63%

10th Standard

SKV Vidhyaashram Senior Secondary School

2022

77.7%
